Understanding Your Results

Now that you've seen your current assessment of where you fall within the 5-Fold Ministry gifts, it's important to understand what it actually means! When you look at the results above, recognize this is a snapshot of where you currently are in your spiritual development. In other words, your top score does not necessarily tell you what your base gift is, it only shows you what you are currently exercising.

Here's what we mean.

Each of us were created and shaped to live out of one of these 5 base ministry gifts. There is one that we do better and more naturally than any of the others. It brings us the most life and the most joy. However, God doesn't only ask us to only operate out of our strength but also out of our weakness. So many times he will give us a season to learn a Base that isn't natural to us, but nevertheless is important for us to learn (we call this a Phase). We won't ever be great at it, but we can learn to be truly competent in it.
